

Tohoku University's Chemistry Summer School 2014

Schedules

Aug. 25 (Mon.) 9:00-

Aug. 26 (Tue.) 9:00-

Place: Graduate School of Science
Tohoku University

Keynote Lectures

H-32 Science Lecture Hall

Prof. Hiroyuki Isobe

“The Nanoworld According to Chemistry”

Prof. Kenji Inaba

“Structural and mechanistic bases of the protein quality control in cells”

Prof. Yuji Matsumoto

“Ionic liquid as a new class of solvents for crystal growth in vacuum: ionic liquid-assisted vapor deposition of high quality organic single crystals and films”

Prof. Mari Yotsu-Yamashita

“Approach to elucidation of biosynthetic pathways towards tetrodotoxin and saxitoxin”

Oral Sessions

Poster Sessions

H-32 Science Lecture Hall

H-02 Science Complex A

Lectures on cutting edge studies will be given by researchers including invited students from abroad.

Campus Asia Program

A Cooperative Asian Education Gateway for a Sustainable Society
